Arrangements to enable directors to acquire shares or debentures

Neither at the end of nor at any time during the financial year was the Company a party to any arrangement whose object is to enable the directors of the Company to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

Directors' interests in shares and debentures

The following directors, who held office at the end of the financial year had, according to the register of directors' shareholdings required to be kept under Section 164 of the Singapore Companies Act, Chapter 50, an interest in shares and share options of the Company and related corporations, as stated below:

Name of directors and Company in which interests are held

At the beginning At the end of the financial year year

Ordinary shares

Sompo Holdings, Inc. (Ultimate holding company)

Yuji Kawauchi 1,800 2,000

Except as disclosed in this report, no director who held office at the end of the financial year had interests in shares, share options, warrants or debentures of the Company, or of related corporations, either at the beginning of the financial year, or date of appointment if later, or at the end of the financial year.

Directors' statement

Share options

There were no share options granted during the financial year to subscribe for unissued shares of the Company.

There were no shares issued during the financial year by virtue of the exercise of options to take up unissued shares of the Company.

There were no unissued shares of the Company under option at the end of the financial year.

Auditor

Ernst & Young LLP have expressed their willingness to accept reappointment as auditor.

Independent auditor's report For the financial year ended 31 December 2018

Independent auditor's report to the member of Sompo Insurance Singapore Pte. Ltd.

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Sompo Insurance Singapore Pte Ltd (the "Company"), which comprise the balance sheet as at 31 December 2018, the statement of profit and loss, statement of comprehensive income, statements of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements of the Company are properly drawn up in accordance with the provisions of the Companies Act, Chapter 50 (the Act) and Financial Reporting Standards in Singapore (FRSs) so as to give a true and fair view of the financial position of the Company as at 31 December 2018 and of the financial performance, changes in equity and cash flows of the Company for the year ended on that date.

Basis for opinion

We conducted our audit in accordance with Singapore Standards on Auditing (SSAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Accounting and Corporate Regulatory Authority (ACRA) Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities (ACRA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Management is responsible for other information. The other information comprises the Directors' Statements included in pages 1 to 2.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Independent auditor's report
For the financial year ended 31 December 2018

Independent auditor's report to the member of Sompo Insurance Singapore Pte. Ltd.

Responsibilities of management and directors for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Act and FRSs, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair financial statements and to maintain accountability of assets.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The directors' responsibilities include overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Independent auditor's report
For the financial year ended 31 December 2018

Independent auditor's report to the member of Sompo Insurance Singapore Pte. Ltd.

Auditor's responsibilities for the audit of the financial statements (cont'd)

• Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

In our opinion, the accounting and other records required by the Act to be kept by the Company have been properly kept in accordance with the provisions of the Act.

1. Corporate information

The financial statements of Sompo Insurance Singapore Pte. Ltd. (the "Company") for the financial year ended 31 December 2018 were authorised by the Board of Directors for issuance on 20 March 2019.

The Company is a limited liability company which is incorporated and domiciled in Singapore.

The Company's immediate holding company is Sompo Holdings (Asia) Pte. Ltd. (formerly known as Sompo Japan Nipponkoa Holdings (Asia) Pte. Ltd.), incorporated in Singapore and the ultimate holding company is Sompo Holdings Inc. (formerly known as Sompo Japan Nipponkoa Holdings Inc.), incorporated in Japan. Related companies in these financial statements refer to the Sompo Holdings Inc. group of companies.

The registered office and principal place of business of the Company is located at 50 Raffles Place, #05-01/06 Singapore Land Tower, Singapore 048623.

The principal activities of the Company are the underwriting and reinsurance of general insurance business. There have been no significant changes in the nature of these activities during the year.

2. Summary of significant accounting policies

2.1 Basis of preparation

The financial statements have been prepared in accordance with Singapore Financial Reporting Standards ("FRS") as required by the Companies Act.

The financial statements have been prepared on a historical cost basis, except for financial assets classified as available-for-sale which have been measured at their fair values.

The accounting policies have been consistently applied by the Company and are consistent with those used in the previous financial year, except as disclosed in the accounting policies below.

The financial statements are presented in Singapore Dollars (SGD or \$), the functional currency of the Company. Management has determined the currency of the primary economic environment in which the Company operates ie. functional currency, to be Singapore Dollars as it best reflect the economic substance of the underlying events and circumstances relevant to the Company. Revenue and major costs including the major operating expenses are primarily influenced by fluctuations in Singapore Dollars.

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expense will not be offset in the statement of comprehensive income unless required or permitted by any accounting standard or interpretation, as specifically disclosed in the accounting policies of the Company.

2.1 Basis of preparation (cont'd)

The preparation of financial statements in conformity with FRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. Areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 3.

The financial statements of the subsidiary have not been consolidated with the Company's financial statements as its ultimate parent, Sompo Holdings Inc. (formerly known as Sompo Japan Nipponkoa Holdings Inc.) incorporated in Japan, prepares consolidated financial statements which are available for public use. The registered address of Sompo Holdings Inc. (formerly known as Sompo Japan Nipponkoa Holdings Inc.) is 26-1 Nishi-Shinjuku 1-chome, Shinjuku-ku, Tokyo, 160-8338 Japan.

2.2 Basis of amalgamation

The financial statements comprise the financial statements of the Company and its related company that had been amalgamated during the prior financial year. Consistent accounting policies are applied to like transactions and events in similar circumstances.

All intra-group balances, income and expenses and unrealised gains and losses resulting from intra-group are eliminated in full.

Amalgamation involving entities under common control are accounted for by applying the pooling of interest method. The assets and liabilities of the amalgamated entities are reflected at their carrying amounts. Any differences between the consideration paid and the share capital and reserves of the "amalgamated" entity is reflected within equity as amalgamation reserve.

2.3 Adoption of new and revised standards

The accounting policies adopted are consistent with those of the previous financial year except in the current financial year, the Company has adopted all the new and revised standards and interpretations of FRS that are effective for annual periods beginning on or after 1 January 2018. The adoption of these standards and interpretations did not have any material effect on the financial performance or position of the Company.

The effect of adoption of Amendments to FRS 104 Applying FRS 109 Financial Instruments with FRS 104 Insurance Contracts is as follows:

The amendments introduce two alternative options for entities issuing contracts within the scope of FRS 104, notably a temporary exemption and an overlay approach. The temporary exemption enables eligible entities to defer the implementation date of FRS 109 for annual periods beginning before 1 January 2021 at the latest.

2.3 Adoption of new and revised standards (cont'd)

The effect of adoption of Amendments to FRS 104 Applying FRS 109 Financial Instruments with FRS 104 Insurance Contracts is as follows (cont'd):

An entity may apply the temporary exemption from FRS 109 if: (i) it has not previously applied any version of FRS 109 and (ii) its activities are predominantly connected with insurance on its annual reporting date that immediately precedes 1 April 2016. If there is a change in the entity's activities:

- (a) an entity that previously qualified for the temporary exemption from FRS 109 shall reassess whether its activities are predominantly connected with insurance at a subsequent annual reporting date and
- (b) an entity that previously did not qualify for the temporary exemption from FRS 109 is permitted to reassess whether its activities are predominantly connected with insurance at a subsequent annual reporting date before 31 December 2018. The overlay approach allows an entity applying FRS 109 to reclassify between profit or loss and other comprehensive income an amount that results in the profit or loss at the end of the reporting period for the designated financial assets being the same as if an entity had applied FRS 39 to these designated financial assets.

An entity can apply the temporary exemption from FRS 109 for annual periods beginning on or after 1 January 2018. An entity may start applying the overlay approach when it applies FRS 109 for the first time.

During 2017, the Company performed an assessment of the amendments and reached the conclusion that its activities are predominantly connected with insurance as at 31 December 2015. As such, the Company will apply the temporary exemption in its reporting period starting on 1 January 2018.

During the financial year, the Company applied the temporary exemption from FRS 109 *Financial Instruments* as permitted by the Amendments to FRS 104 *Insurance Contracts: Applying FRS 109 Financial Instruments with FRS 104 Insurance Contracts* which is effective for annual periods beginning on or after 1 January 2018. The temporary exemption permits the Company to continue applying FRS 39 rather than FRS 109 for annual periods beginning before 1 January 2021.

The Company concluded that it qualified for the temporary exemption from FRS 109 as the Company has not previously applied any versions of FRS 109 and its activities are predominantly connected with insurance at annual reporting date that immediately precedes 1 April 2016 (i.e. 31 December 2015). As at 31 December 2015, the Company's gross liabilities arising from contracts within the scope of FRS 104 represented 97% of the total carrying amount of all its liabilities. Since 31 December 2015, there has been no change in the activities of the Company that requires reassessment of the use of the temporary exemption.

2.3 Adoption of new and revised standards (cont'd)

The effect of adoption of Amendments to FRS 104 Applying FRS 109 Financial Instruments with FRS 104 Insurance Contracts is as follows (cont'd):

The table below presents an analysis of the fair value of classes of financial assets as at 31 December 2018, as well as the corresponding change in fair value during the financial year. The financial assets are divided into two categories:

- Assets for which their contractual cash flows represent solely payments of principal
 and interest ("SPPI"), excluding any financial assets that are held for trading or that
 are managed and whose performance is evaluated on a fair value basis; and
- All financial assets other than those specified in SPPI above (i.e. those for which
 contractual cash flows do not represent SPPI, assets that are held for trading and
 assets that are managed and whose performance is evaluated on a fair value basis).

The fair value as at 31 December 2018 and fair value change of the Company's financial assets during the year, based on the classification in accordance with FRS 109, is as follows:

	SPPI financ	cial assets Fair value	Other financial assets Fair value

Trade debtors	19, 94 0,433	_	-	_
Other debtors	4,413,458	_	_	
Total	400,685,410	(3,227,220)	2,936,014	(491,880)

Refer to the table as disclose in Note 24(b)(i) that shows the carrying amount of the SPPI assets included in the table above by credit risk rating grades. The carrying amount is measured in accordance with FRS 39 although this is prior to any impairment allowance for those measured at amortised cost.

As at 31 December 2018, the fair value of financial assets that do not have low credit risk was \$81,268,617 (2017: \$78,172,541).

2.4 Standards issued but not yet effective

The significant standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these standards, if applicable, when they become effective.

Effective for annual periods beginning on or after

Description

FRS 116 Leases FRS 117 Insurance Contracts 1 January 2019 1 January 2021

FRS 116 Leases

FRS 116 requires lessees to recognise most leases on balance sheets. The standard includes two recognition exemptions for lessees - leases of 'low value' assets and short-term leases. FRS 116 is effective for annual periods beginning on or after 1 January 2019. At commencement date of a lease, a lessee will recognise a liability to make a lease payment (i.e. the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e. the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

The Company plans to adopt FRS 116 retrospectively with the cumulative effect of initially applying the standard as an adjustment to the opening retained earnings at the date of initial application, 1 January 2019. On the adoption of FRS 116, the Company expects to choose, on a lease-by-lease basis, to measure the right-of-use asset at either:

- its carrying amount as if FRS 116 had been applied since the commencement date, but discounted using the lessee's incremental borrowing rate as of 1 January 2019;
- (b) (a) an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the statement of financial position immediately before 1 January 2019.

In addition, the Company plans to elect the following practical expedients:

- not to reassess whether a contract is, or contains a lease at the date of initial application and to apply FRS 116 to all contracts that were previously identified as leases.
- to apply the exemption not to recognise right-of-use asset and lease liabilities to leases for which the lease term ends within 12 months as of 1 January 2019.

The Company has performed a preliminary impact assessment based on currently available information, and the assessment may be subject to changes arising from ongoing analysis until the Company adopts FRS 116 in 2019. On the adoption of FRS 116, the Company expects to recognise right-of-use assets and lease liabilities amounting to \$2,586,516 for its leases previously classified as operating leases as of 1 January 2019.

2.4 Standards issued but not yet effective (cont'd)

FRS 117 Insurance Contracts

In March 2018, Accounting Standards Council Singapore ("ASC") issued FRS 117 *Insurance Contracts*, a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. FRS 117 provides a comprehensive model (the general model) for insurance contracts, supplemented by the variable fee approach for contracts with direct participation features that are substantially investment-related service contracts, and the premium allocation approach mainly for short duration which typically applies to certain non-life insurance contracts.

The overall objective of FRS 117 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in FRS 104 *Insurance Contracts*, which are largely based on grandfathering previous local accounting policies, FRS 117 provides a comprehensive model, supplemented by:

- a specific adaptation for contracts with direct participation features (the variable fee approach); and
- a simplified approach (the premium allocation approach) mainly for short-duration contracts

FRS 117 effective for annual reporting periods beginning on or after 1 January 2021*, with comparative figures required. Retrospective application is required. However, if full retrospective application for a group of insurance contracts is impracticable, then the entity is required to choose either a modified retrospective approach or a fair value approach.

The Company is evaluating the impact of the new standard on its financial statements and related disclosures and plans to adopt the new standard on the required effective date.

In November 2018, International Accounting Standard Board announced a proposed one-year delay to the effective date of IFRS 17 to reporting periods beginning on or after 1 January 2022.

2.5 Property and equipment

All items of property and equipment are initially recorded at cost. Subsequent to recognition, property and equipment and furniture and fixtures are measured at cost less accumulated depreciation and any accumulated impairment losses. The cost includes the cost of replacing part of the property and equipment. The cost of an item of property and equipment is recognised as an asset if, and only if, it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

When significant parts of property and equipment are required to be replaced in intervals, the Company recognises such parts as individual assets with specific useful lives and depreciation, respectively. All other repair and maintenance costs are recognised in profit or loss as incurred.

Depreciation is calculated on the straight-line method to write off the cost of the assets over their estimated useful lives which are as follows:

Leasehold improvements

Over the term of lease

Motor vehicles - 5 years
Renovations - 3 years
Furniture and fittings - 3 years
Office equipment - 3 years
Computers - 3 to 5 years

The carrying amounts are reviewed at each balance sheet date to assess whether they are recorded in excess of their recoverable amount, and if carrying values exceed their recoverable amount, assets are written down.

The residual value, useful life and depreciation method are reviewed at each financial yearend, and adjusted prospectively, if appropriate.

Property and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on derecognition of the asset is included in profit or loss in the year the asset is derecognised.

The Company adopts a policy of writing off individual items of property and equipment amounting to below \$1,500 in the year of purchase.

2.6 Intangible assets

Intangible assets acquired separately are measured initially at cost. Following initial acquisition, intangible assets are measured at cost less accumulated amortisation and any accumulated impairment losses. The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets with indefinite lives are tested for impairment annually, or more frequently if the events and circumstances indicate that the carrying value may be impaired. Such intangible assets are not amortised. The useful life of an intangible asset with an indefinite useful life is reviewed annually to determine whether the useful life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite should be accounted for as a change in an accounting estimate.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss when the asset is derecognised.

Bancassurance rights

Bancassurance rights relate to the cost of the Bancassurance Distribution Agreement entered into with a bank. The cost is capitalised and amortised over the estimated finite useful lives (i.e., the term of Bancassurance Distribution Agreement) and assessed for impairment whenever there is an indication that it may be impaired. The amortisation period and the amortisation method are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates.

Club membership

Club membership is carried at cost less any accumulated impairment losses, if any. No amortisation is provided as management has assessed the useful life of the club membership to be indefinite. Club membership is tested for impairment annually or more frequently if the events or changes in circumstances indicate that the carrying value may be impaired. The useful life of a club membership is reviewed annually to determine whether the useful life assessment continues to be supportable.

2.7 Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment assessment for an asset is required, the Company makes an estimate of the asset's recoverable amount.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets. In assessing value in use, the estimated future cash flows expected to be generated by the asset are discounted to their present value. Where the carrying amount of an asset exceeds its recoverable amount, the asset is written down to its recoverable amount.

Impairment losses are recognised in the statement of profit and loss except for assets that are previously revalued where the revaluation was taken to equity. In this case the impairment is also recognised in equity up to the amount of any previous revaluation.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increase cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss be recognised previously. Such reversal is recognised in the statement of profit and loss unless the asset is measured at revalued amount, in which case the reversal is treated as a revaluation increase.

2.8 Investment in subsidiary

The investment in subsidiary is stated at cost, less any impairment in recoverable value.

A subsidiary is an investee that is controlled by the Company. The Company controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

2.9 Financial assets

The Company classified its non-derivative financial assets into the following categories: available-for-sale financial assets, loans and receivables and financial assets at fair value through profit or loss.

Initial recognition and measurement

Financial assets are recognised on the balance sheet when, and only when, the Company becomes a party to the contractual provisions of the financial instrument. The Company determines the classification of its financial assets at initial recognition. When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss, directly attributable transaction costs.

(a) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term.

Subsequent to initial recognition, financial assets at fair value through profit or loss are measured at fair value. Any gains or losses arising from changes in fair value of the financial assets are recognised in profit or loss. Net gains or net losses on financial assets at fair value through profit or loss include exchange differences, interest and dividend income.

(b) Loans and receivables

Non-derivative financial assets with fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Subsequent to initial recognition, loans and receivables are measured at amortised cost using the effective interest method, less impairment. Gains and losses are recognised in profit or loss when the loans and receivables are derecognised or impaired, and through the amortisation process.

Cash, bank balances and deposits, trade debtors and other debtors including those with related parties are carried at amortised cost and are considered as loans and receivables.

2.9 Financial assets (cont'd)

Initial recognition and measurement (cont'd)

(c) Available-for-sale financial assets

The Company classifies its investments as available-for-sale financial assets.

The available-for-sale financial assets are initially recognised at cost, being the fair value of the consideration given and including incremental acquisition charges associated with the investment.

After initial recognition, available-for-sale financial assets are subsequently measured at fair value. Any gains or losses from changes in fair value of the financial asset are recognised in other comprehensive income, except that impairment losses, foreign exchange gains and losses on monetary instruments and interest calculated using the effective interest method are recognised in profit or loss. The cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment when the financial asset is derecognised.

Investments in equity instruments whose fair value cannot be reliably measured are measured at cost less impairment loss.

Derecognition

A financial asset is derecognised where the contractual right to receive cash flows from the asset has expired or it transfers the right to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial assets are transferred. On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received and any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

All regular way purchases and sales of financial assets are recognised or derecognised on the trade date i.e., the date that the Company commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace concerned.

2.10 Impairment of financial assets

(a) Available-for-sale financial assets

In the case of equity investments classified as available-for-sale, objective evidence of impairment include (i) significant financial difficulty of the issuer or obligor, (ii) information about significant changes with an adverse effect that have taken place in the technological, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in equity instrument may not be recovered; and (iii) a significant or prolonged decline in the fair value of the investment below its costs. 'Significant' is to be evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost.

If an available-for-sale financial asset is impaired, an amount comprising the difference between its acquisition cost (net of any principal repayment and amortisation) and its current fair value, less any impairment loss previously recognised in profit or loss is transferred from other comprehensive income and recognised in profit or loss. Reversals of impairment losses in respect of equity instruments are not recognised in profit or loss; increase in their fair value after impairment are recognised directly in other comprehensive income.

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in profit or loss. Future interest income continues to be accrued based on the reduced carrying amount of the asset, using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income. If, in a subsequent year, the fair value of a debt instrument increases and the increases can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed in profit or loss.

If there is objective evidence (such as significant adverse changes in the business environment where the issuer operates, probability of insolvency or significant financial difficulties of the issuer) that an impairment loss on the financial assets carried at cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed in subsequent periods.

2.10 Impairment of financial assets (cont'd)

(b) Financial assets carried at amortised cost

Management reviews its loans and receivables for objective evidence of impairment at least quarterly. Significant financial difficulties of the debtor, the probability that the debtor will enter bankruptcy, and default or significant delay in payments are considered objective evidence that a receivable is impaired. In determining this, management makes judgement as to whether there is observable data indicating that there has been a significant change in the payment ability of the debtor, or whether there have been significant changes with adverse effect in the technological, market, economic or legal environment in which the debtor operates in.

If there is objective evidence that an impairment loss on financial assets carried at cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The impairment loss is recognised in profit or loss.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed to the extent that the carrying amount of the asset does not exceed its amortised cost at the reversal date. The amount of reversal is recognised in profit or loss.

2.11 Insurance receivables

Insurance receivables are recognised when due and measured on initial recognition at the fair value of the consideration received or receivable. Subsequent to initial recognition, insurance receivables are measured at amortised cost, using the effective interest rate method. The carrying value of insurance receivables is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable, with the impairment loss recorded in the profit or loss.

Insurance receivables are derecognised when the derecognition criteria for financial assets, as described in Note 2.9 have been met.

2.12 Cash, bank balances and deposits

Cash, bank balances and deposits consist of current accounts, fixed deposits with banks and cash on hand.

Cash equivalents are those that are readily convertible to know amount of cash and which are subject to an insignificant risk of changes in value.

2.13 Financial liabilities

Financial liabilities are recognised on the balance sheet when, and only when, the Company becomes a party to the contractual provisions of the financial instrument. All financial liabilities are recognised initially at fair value and in the case of other financial liabilities, plus directly attributable transaction costs.

The carrying amounts of these financial liabilities are reasonable approximation of fair values, either due to their short-term nature on or near the balance sheet date.

After initial recognition, financial liabilities at fair value through profit and loss are measured at fair value. Any gains or losses arising from changes in fair value of the financial liabilities are recognised in profit or loss.

Other financial liabilities are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in profit and loss when the liabilities are recognised, and through the amortisation process.

Trade and other payables

Liabilities for trade and other amounts payable are carried at amortised cost, which is the fair value of the consideration to be paid in the future for goods and services received, whether or not billed to the Company.

Payables to holding and related companies are carried at amortised cost.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the statement of profit and loss.

2.14 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) where as a result of a past event, it is probable that an outflow of economic resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provision is reversed. If the effect of the time value of money is material, provisions are discounted using a current pre tax rate that reflects, where appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

2.15 Insurance contracts and related liabilities

Insurance contracts are those contracts when the Company (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period. Any contract not considered insurance contracts under the FRS are classified as investment contracts.

General insurance contract liabilities include the outstanding claims provision, the unearned premium reserve and the provision for premium deficiency. These liabilities, where necessary, are discounted for the time value of money. The outstanding claims provision is based on the estimated ultimate cost of all claims incurred but not settled at the reporting date, whether reported or not, together with related claims handling costs and reduction for the expected value of salvage and other recoveries. Delays can be experienced in the notification and settlement of certain types of claims, therefore the reporting date using a range of standard actuarial claim projection techniques, based on empirical data and current assumptions that may include a margin for adverse deviation. No provision for equalisation or catastrophe reserves is recognised. The liabilities are derecognised when the obligation to pay a claim expires, is discharged or is cancelled.

2.16 Reinsurance

The Company cedes insurance risk in the normal course of business for all of its businesses. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision or settled claims associated with the reinsurer's policies and are in accordance with the related insurance contract.

Reinsurance assets are reviewed for impairment at each reporting date or more frequently when an indication of impairment arises during the reporting year. Impairment occurs when there is objective evidence as a result of an event that occurred after initial recognition of the reinsurance asset that the Company may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the Company will receive from the reinsurer. The impairment loss is recorded in the profit or loss.

Gains and losses on buying reinsurance are recognised in the profit or loss immediately at the date of purchase and are not amortised.

Ceded reinsurance arrangements do not relieve the Company from its obligations to policyholders.

2.16 Reinsurance (cont'd)

The Company also assumes reinsurance risk in the normal course of business for insurance contracts where applicable. Premiums and claims on assumed reinsurance are recognised as revenue or expenses in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the related insurance contract.

Premiums and claims are presented on a gross basis for both ceded and assumed reinsurance.

Reinsurance assets or liabilities are derecognised when the contractual rights are extinguished or expires or when the contract is transferred to another party.

Reinsurance contracts that do not transfer significant insurance risk are accounted for directly through the balance sheet. These are deposit assets or financial liabilities that are recognised based on the consideration paid or received less any explicit identified premiums or fees to be retained by the reinsured. Investment income on these contracts is accounted for using the effective interest rate method when accrued.

2.17 Premium liabilities

Premium liabilities comprises the sum of unearned premium reserves and premium deficiency reserves. Premium deficiency reserves are derived using actuarial methods on loss statistics and are recognised when the expected value of claims and expenses attributable to the unexpired period of policies in force at the balance sheet date for any line of business exceeds the unearned premium reserves.

The unearned premium reserves are computed on the following basis:

- (a) on the basis not less accurate than the 1/24th method for all direct and facultative reinsurance classes of business other than marine cargo, for which 25% is applicable
- (b) in the case of all classes of treaty reinsurance business, other than marine cargo, 40% of the premiums and for marine cargo, 25% of the premium; and
- (c) the actual acquisition cost is taken into account in the computation in respect of direct and facultative reinsurance business, except for marine cargo and treaty reinsurance business

The provision for unearned premiums represents that portion of premiums received or receivable that relates to risks that have not yet expired at the reporting date. The provision is recognised when contracts are entered into and premiums are charged, and is brought to account as premium income over the term of the contract in accordance with the pattern of insurance service provided under the contract.

Unexpired risk reserves is calculated based on the expected loss on unexpired policies after taking into consideration all benefits, claims, claims adjustment expenses, acquisition cost, maintenance expenses, and policyholders experience participation, as determined by the Actuary.

2.17 Premium liabilities (cont'd)

Liability adequacy test

At each reporting date, the Company reviews its unexpired risks and a liability adequacy test is performed to determine whether there is any overall excess of expected claims over unearned premiums. This calculation uses current estimates of future contractual cash flows (taking into consideration current loss ratios) after taking account of any loss adjustors' expenses. If these estimates show that the carrying amount of the unearned premiums is inadequate, the deficiency is recognised in profit or loss by setting up a provision for liability adequacy.

2.18 Deferred acquisition costs ("DAC")

Commission costs incurred during the financial period arising from securing new insurance contracts and/or renewing existing insurance contracts are deferred to the extent that they are recoverable out of future premiums. All other acquisition costs are recognised as an expense when incurred.

Subsequent to recognition, DAC is amortised over the period in which the related revenues are earned. The reinsurers' share of deferred acquisition costs is amortised in the same manner as the underlying asset amortisation is recorded in the profit and loss.

Changes in the expected useful life or expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period and are treated as a change in an accounting estimate.

An impairment review is performed at each reporting date or more frequently when an indication of impairment arises. When the recoverable amount is less than the carrying value an impairment loss is recognised in the income statement. DAC are also considered in the liability adequacy test for each reporting period.

DAC are derecognised when the related contracts are either settled or disposed of.

2.19 Deferred reinsurance commissions

Commissions receivable on outwards reinsurance contracts are deferred and amortised on straight line basis over the term of the expected premiums payable.

2.20 *Claims*

General insurance claims incurred include all claim losses occurring during the year, whether reported or not, including the related handling costs and reduction for the value of salvage, other recoveries and any adjustments to claim's outstanding from prior years.

Reinsurance claims

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contract.

2.21 Claims liabilities

Provision is made for the estimated cost of all claims notified but not settled at the balance sheet date, less reinsurance recoveries, using the best information available at that time. Provision is also made for claims incurred but not reported (IBNR) at the balance sheet date based on historical claims experience, adjusted for variations in expected future settlement, as well as direct and indirect claims expenses.

At each reporting date, prior year's claim estimates are reassessed for adequacy and changes are made to the provision. Additional provision may be made by management as deemed necessary.

2.22 Revenue and expense recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is made. The following specific recognition criteria must also be met before revenue is recognised:

(a) Premium income

Premium income is recognised at the time a policy is issued, which approximates the inception date of the risk. Reinsurance premium income is recognised when advised. Premiums include any adjustments arising in the accounting period for premiums receivable in respect of business written in prior accounting periods. Rebates that form part of the premium rate, such as no-claim rebates, are deducted from the gross premium; others are recognised as an expense.

Premiums on long-term policies are recognised at commencement of contract and premiums not relating to the current financial year have been adjusted for as long term unexpired risk.

Outward reinsurance premiums are accounted for in the same accounting period as the premiums for the related direct insurance business.

At initial recognition of premiums, an unearned premium reserves is established equal to the amount of written premium. Premium is then recognised as earned over the policy term in accordance with the period of insurance service, by recording changes in the unearned provision against premium income.

(b) Commission expense

Commission expenses paid or payable to intermediaries (brokers/agents) upon acquiring new and renewal insurance business are recognised as expenses in profit and loss.

(c) Commission income

Commission income comprises reinsurance commissions received or receivable from reinsurers and is recognised as income in profit or loss.

2.22 Revenue and expense recognition (cont'd)

(d) Interest income

Interest income is recognised using the effective interest method.

(e) Dividend income

Dividend income is recognised when the Company's right to receive payment is established.

2.23 Employee benefits

(a) Defined contribution plan

As required by Singapore law, the Company makes contributions to the state pension scheme, the Central Provident Fund ("CPF"). CPF contributions are recognised as compensation expense in the same period as the employment that gives rise to the contribution.

(b) Employee leave entitlement

Employee entitlements to annual leave are recognised as a liability when they accrue to employees. The estimated liability for leave is recognised for services rendered by employees up to balance sheet date.

2.24 Operating leases

Leases where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are taken to the statement of profit and loss on straight-line basis over the period of the lease.

2.25 Income taxes

(a) Current tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance sheet date.

Current income taxes are recognised in profit or loss except that tax relating to items recognised outside profit or loss, either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

2.25 Income taxes (cont'd)

(b) Deferred tax

Deferred income tax is provided using the liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all temporary differences.

Deferred income tax assets are recognised for all deductible temporary differences, the carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Unrecognised deferred income tax assets are reassessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

Deferred taxes are recognised in the statement of profit and loss except that deferred tax relating to items recognised directly in equity is recognised directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

(c) Goods and services tax ("GST")

Revenues, expenses and assets are recognised net of the amount of GST except:

- Where the GST incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- Receivables and payables that are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

2.26 Foreign currency transactions

Transactions in foreign currencies are measured in the functional currency of the Company and are recorded on initial recognition in the functional currencies at exchange rates approximating those ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising from the settlement of monetary items or on translating monetary items at the balance sheet date are recognised in the statement of profit and loss.

2.27 Contingencies

A contingent liability is:

- (a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company; or
- (b) a present obligation that arises from past events but is not recognised because:
 - (i) It is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
 - (ii) The amount of the obligation cannot be measured with sufficient reliability.

2.28 Related parties

A related party is defined as follows:

- (a) A person or a close member of that person's family is related to the Company if that person:
 - (i) has control or joint control over the Company;
 - (ii) has significant influence over the Company; or
 - (iii) is a member of the key management personnel of the Company or of a parent of the Company.
- (b) An entity is related to the Company if any of the following conditions applies:
 - (i) the entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
 - (ii) one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
 - (iii) both entities are joint ventures of the same third party.
 - (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity.
 - (v) the entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company. If the Company is itself such a plan, the sponsoring employers are also related to the Company;
 - (vi) the entity is controlled or jointly controlled by a person identified in (a); or
 - (vii) a person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

3. Significant accounting estimates and judgements

Estimates, assumptions concerning the future and judgements are made in the preparation of the financial statements. They affect the application of the Company's accounting policies, reported amounts of assets, liabilities, income and expenses, and disclosures made. They are assessed on an on-going basis and are based on experience and relevant factors, including expectations of future events that are believed to be reasonable under the circumstances.

Key sources of estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(a) Income taxes

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the Company. The carrying amounts of the Company's income tax payables and deferred tax assets at the balance sheet date were \$Nil (2017: \$Nil) and \$11,520,312 (2017: \$9,651,643) respectively.

Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies. The carrying value at the end of the reporting period for deferred tax asset is disclosed in Note 7 to the financial statements.

3. Significant accounting estimates and judgements (cont'd)

Key sources of estimation uncertainty (cont'd)

(b) Insurance contract liabilities

Significant judgement is also involved in determining the Company's insurance contract liabilities. The claims reserve estimation process involves estimation of reserve of outstanding reported claims (case reserves), and estimation of additional reserves for IBNR and expected future movements in the estimated ultimate liabilities associated with outstanding reported claims incurred but not enough reported (IBNER). Case reserves are set and periodically reviewed by the claims department. IBNR and IBNER reserves are determined by the Company after taking into account the certifying actuary's assessment. The total claim liabilities are subject to a quarterly actuarial review and at year end a formal actuarial report will be provided on the adequacy of the Company's claim liabilities.

In forming their view on the adequacy of the claims reserve, the actuary uses a variety of statistical projection techniques like the Chain Ladder and Bornhuetter-Ferguson methods. Claims reserve is separately analysed by class of business and it is intended to provide a minimum of 75% level of assurance of adequacy, and as such include a provision for adverse deviation (PAD) beyond the best estimate of the claim liabilities. The best estimates for premium liabilities have been determined such that the total liability reserve would be adequate to pay for future claims and expenses in servicing the unexpired policies as of the valuation date. In calculating these premium liabilities for the various classes, we generally used the expected loss ratio method ("ELR") based on the outcome of the analysis for claim liabilities to determine suitable ultimate loss ratio. The results were used in this case to derive the premium liabilities.

The process, estimation, sensitivities and key assumptions used in determining the insurance contract liabilities are further discussed in Note 24.

(c) Impairment of trade debtors

The Company assesses at the end of each reporting period whether there is any objective evidence that a financial asset is impaired. To determine whether there is objective evidence of impairment, the Company considers factors such as the probability of insolvency or significant financial difficulties of the debtor and default or significant delay in payments.

Where there is objective evidence of impairment, the amount and timing of future cash flows are estimated based on historical loss experience for assets with similar credit risk characteristics. The provision for allowance for doubtful receivables for the year ended 31 December 2018 amounted to \$111,715 (2017: \$Nil) as disclosed in Note 9.

7. Taxation (cont'd)

(b) Deferred taxation (cont'd)

At the end of the reporting period, the Company has tax losses of approximately \$139,449,506 (2017: \$157,793,000) that are available for offset against future taxable profits of the Company, and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered. The use of these tax losses is subject to the agreement of the tax authorities and compliance with Singapore Income Tax regulations.

(c) Provision for taxation

Other debtors (Note 10) Amounts owing from holding companies (non-trade)	4,413,458	6,517,884
(Note 8) Amounts owing from related companies (non-trade)	975,063	2,043,758
(Note 8)	4,346	32,764
Cash, bank balances and deposits (Note 12)	103,916,225	120,181,797
Total financial assets at amortised cost and classified as loans and receivables	129,249,525	148,381,907

Trade debtors relate to amount due from insurers, agents, broker and intermediaries and reinsurers. Trade debtors are non-interest bearing receivables that are due but not impaired and are generally on 30 to 90 days' credit terms. They are recognised at their original invoice amounts which represent their fair value on initial recognition.

The Company has trade receivables amounting to \$3,509,620 (2017: \$4,223,327) that are past due at the balance sheet date but not impaired. These receivables are unsecured and the analysis of their aging at the balance sheet date is as follows:

	2018 \$	2017 \$
Trade receivables past due not impaired:		
Less or equal to 90 days	1,075,243	1,594,587
91 to 120 days	443,705	(608,500)
121 to 180 days	477,611	964,171
181 to 365 days	1,376,278	1,732,700
More than 365 days	136,783	540,369
Total	3,509,620	4,223,327

11. Available-for-sale financial assets

	2018 \$	2017 \$
Corporate and statutory board bonds Government bonds	271,435,885	246,982,575 257,438
Quoted equity shares Unquoted equity shares	2,935,597 417	6,8 10 ,567 417
Total available-for-sale financial assets	274,371,899	254,050,997

The fair values of financial instruments that are actively traded in organised financial markets are determined by reference to quoted market bid prices, at the close of business on the reporting date, without any deduction for transaction costs.

For units in unit trusts, money market funds and shares in open ended investment companies, fair value is determined by reference to published bid values.

Investments in corporate, statutory board and government bonds bear interest ranging from 1.6% to 5.8% (2017: 1.6% to 6%) per annum. The maturity of these investments is disclosed in Note 24 (b) (ii).

The carrying values are determined as follows:

	2018 \$	2017 \$
Balance at beginning of the year Additions Redemptions and disposals Amortisation of (premium)/discount on bonds (Note 19) Unrealised fair value gain/(loss)	254,050,997 68,046,062 (41,208,686) (925,930) (5,590,544)	180,301,873 177,073,221 (106,475,545) (211,059) 3,362,507
Balance at end of the year	274,371,899	254,050,997

11. Available-for-sale financial assets (cont'd)

Fair value hierarchy

The Company classifies fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 Inputs for the asset or liability that are not based on observable market date (unobservable inputs).

The following table shows an analysis of financial instruments carried at fair value by level of fair value hierarchy:

	Quoted prices in active markets for identical instruments (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total \$
2018				
Financial assets:				
Available-for-sale financial assets	274,371,482	_	417	274,371,899
2017				
Financial assets:				
Available-for-sale financial assets	254,050,580	_	417	254,050,997

12. Cash, bank balances and deposits

Cash, bank balances and deposits comprise the following amounts:

	2018 \$	2017 \$
Fixed deposits Cash, bank balances and deposits	77,646,834 26,269,391	89,592,341 30,589,456
Cash, bank balances and deposits included in balance sheet Fixed deposits held in trust for policyholders Cash, bank balances and deposits held in trust for	103,916,225 (1,640,086)	120,181,797 (1,643,240)
policyholders Cash and cash equivalents included in cash flow statements	102,237,511	(36,128)

Fixed deposits are made for varying periods less than 1 year depending on the immediate cash requirements of the Company, and earn interest at the respective fixed deposit rates ranging from 1.23% to 2.00% (2017: 0.79% to 1.40%)per annum.

13. Trade creditors

	2018 \$	2017 \$
Holding company	655,695	372,799

Service agreement fees to		
- Holding company	38,626	108,883

In 2017, the Company decided to discontinue its reinsurance arrangements with some of its related companies in the ASEAN region. In prior years, such arrangements allowed the same related companies to cede their insurance business to the Company.

(b) Compensation of key management personnel

	2018 \$	2017 \$
Short-term employee benefits Central Provident fund contributions	725,683 9,181	687,482 9,181
	734,864	696,663
Comprise amounts paid to:		
- Directors of the Company (Note 18)	734,864	696,663

Key management personnel include non-independent directors.

23. Operating lease commitments

The Company has entered into commercial property leases for the office space. Operating lease expense recognised as an expense in the profit or loss for the financial year ended 31 December 2018 amounted to \$3,879,774 (2017: \$3,639,395). Future minimum lease payments under non-cancellable leases as of 31 December are as follows:

	2018 \$	2017 \$
Not later than 1 year Later than 1 year but not later than 5 years*	3,722,484 15,903,552	3,879,774 2,581,539
	19,626,036	6,461,313

^{*} The Company has renewed its lease agreement with S L Development Pte Ltd from 1 September 2019 to 31 August 2024.

24. Management of insurance risk and financial risk

The Company has a Risk Management Committee that has established a risk manual and an enterprise risk management framework that allows the Company to be prepared for risks.

This framework specifies the practices and processes that need to be in place to manage the Company's financial and non-financial risks on an on-going basis.

The main risks arising from the Company's insurance contracts and financial instruments are summarised below:

(a) Insurance risk

The Company principally writes a regional book of general insurances comprising Marine Cargo, Motor, Property, Workmen's Compensation and General Accident.

Regional territories are made up mainly of Indonesia, Malaysia, Philippines, Singapore, Thailand and Vietnam.

The Company manages its insurance risk through a comprehensive risk management policy where key performance and risk indicators are clearly defined and monitored. Underwriting guidelines sets out the Company's underwriting strategy, direction and risk appetite by product lines.

The most significant exposure is expected to arise from risks involving properties with high values. To manage this, the Company closely monitors the policy developments and ensures that proper reinsurance protection is in place to protect its net profitability and solvency.

The Company purchases reinsurance coverage on both treaty and facultative basis. The Company's net retention varies according to product lines and loss experience.

The Company relies on its reinsurance arrangements to protect its liquidity and solvency when large losses arise. Its reinsurance placements are diversified and spread amongst selected reinsurers to avoid over-reliance on any single reinsurer.

(a) Insurance risk (cont'd)

To mitigate the risk of reinsurance failure, the Company adopts a strict reinsurance management policy that is governed by two key criteria, namely reinsurance usage selection and reinsurance usage concentration. The Company monitors these indicators actively and takes corrective action whenever the need arises.

The table below sets out the concentration of claims liabilities by type of contract:

	Reinsurers'					
Claims liabilities	Gross claims liabilities \$'000	share of claims liabilities \$'000	Net claims liabilities \$'000			
At 31 December 2018						
Marine Motor Property Workmen's Compensation Others	3,921 37,461 17,067 11,633 20,355	(802) (5,899) (13,107) (1,674) (9,804)	3,119 31,562 3,960 9,959 10,551			
Total	90,437	(31,286)	59,151			
At 31 December 2017						
Marine Motor Property Workmen's Compensation Others	5,797 34,105 40,821 13,195 22,774	(2,437) (5,625) (35,360) (2,435) (11,612)	3,360 28,480 5,461 10,760 11,162			
Total	116,692	(57,469)	59,223			

(a) Insurance risk (cont'd)

The geographical concentration of the Company's insurance liabilities at 31 December 2018 is as follows. The disclosure is based on the countries where the insurance business is written.

Claims liabilities	Gross claims liabilities \$'000	Reinsurers' share of claims liabilities \$'000	Net claims liabilities \$'000
At 31 December 2018			
Indonesia Philippines Singapore Thailand Others Total	16 81,793 6,118 2,510 90,437	(30,943) - (343) (31,286)	16 50,850 6,118 2,167 59,151
At 31 December 2017			
Indonesia Philippines Singapore Thailand Others	643 886 89,525 19,228 6,410	- (57,416) (4) (49)	643 886 32,109 19,224 6,361
Total	116,692	(57,469)	59,223

(b) Financial risk

The Company is exposed to financial risk arising from its operations and the use of financial instruments. In particular the key financial risk is that the proceeds from its financial assets may not be sufficient to fund the obligations arising from its insurance contracts. The key financial risks include credit risk, liquidity risk, currency risk and interest rate risk.

(i) Credit risk

Credit risk is risk of loss that arises when an obligor fails to perform its obligations under a contract or when its ability to perform such obligations is impaired.

Asset concentration risk reflects the additional risk of a high concentration of investments in a single company, group of companies, instrument, industry, geographical area, currency, etc. It is well recognised that diversification of investment portfolio reduces risk.

(b) Financial risk (cont'd)

(i) Credit risk (cont'd)

The following is an overview of how the Company manages its significant credit risk exposure:

Reinsurance

Reinsurance is placed with highly rated reinsurers and concentration of risk is monitored periodically. The Company reviews the creditworthiness of reinsurers before renewing the reinsurance arrangements annually, in accordance to the prevailing reinsurance strategy and guidelines.

Investment securities

The Company limits its exposure by setting maximum limits of portfolio securities with a single or group of issuers. The Company also makes use of institutions with high creditworthiness.

Derivatives

The Company does not enter into derivative contracts.

Insurance receivables

The credit risk in respect of the customer balances incurred on the non-payment of premiums or contributions will only persist during the grace period specified in the policy document.

Commission paid to intermediaries is netted off against amounts receivable from them to reduce the risk of doubtful debts.

The following table provides information regarding the credit risk exposure of the Company at 31 December 2018 by classifying assets according to credit ratings of the counterparties.

Classification of Credit Rating Agencies

Class	Standard & Poor's	Fitch Inc.	A.M. Best	Moody's
A B C	AAA to AA- A+ to A- BBB to BBB-	AAA to AA- A+ to A- BBB to BBB-	A++ to A+ A to A- B++ to B+	Aaa to Aa3 A1 to A3 Baa1 to Baa3

Total financial assets	403,620	402,434

Non-rated debt securities included holdings of debt securities issued by Singapore Statutory Boards amounting to \$52.58 million (2017: \$53.14 million).

(ii) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet cash commitments associated with financial instruments. Liquidity risk may result from either the inability to sell financial assets quickly at their fair values or counterparty failing on repayment of a contractual obligation or insurance liability falling due for payment earlier than expected or inability to generate cash inflows as anticipated.

The Company is exposed to daily cash calls on its available cash resources mainly from claims arising from short term insurance contracts. Liquidity risk is the risk that cash may not be available to pay obligations when due at a reasonable cost. The Board sets limits on the minimum proportion of maturing funds available to meet such calls that should be in place to cover these claims.

(b) Financial risk (cont'd)

(ii) Liquidity risk

The table below summarises the maturity profile of the Company's financial assets and liabilities based on undiscounted contractual obligations from the reporting date to the contractual maturity or expected repayment date. For claims liabilities and reinsurer's share of claims liabilities, their maturity profiles are determined based on the estimated timing of net cash outflows on an undiscounted basis.

		No				
2018	Carrying value \$'000	maturity date \$'000	Less than 1 year \$'000	1 to 5 years \$'000	Over 5 years \$'000	Total \$'000

(b) Financial risk (cont'd)

(iii) Currency risk

Currency risk is the risk of loss resulting from changes in foreign currency exchange rates. Fluctuations in exchange rates between the Singapore dollar and the other currencies in which the Company conducts business may affect its financial condition and results of operations. The Company seeks to limit its exposure to foreign currency risk by minimising its net foreign currency position.

The table below summarises the Company's exposure to currency risk at the end of the year by categorising the net financial assets and liabilities by major currencies.

2018	Singapore Dollars \$'000	United States Dollars \$'000	Thailand Baht \$'000	Others \$'000	Total \$'000

(b) Financial risk (cont'd)

(iii) Currency risk (cont'd)

Sensitivity analysis for foreign currency risk

The following table demonstrates the sensitivity of the Company's profit net of tax to a reasonably possible change in the USD and THB exchange rates against the functional currency of the Company, with all other variables held constant.

		2018 \$'000	2017 \$'000
Increase/(d equity (be	ecrease) in profit and efore tax)		
USD/SGD	Strengthened 5%Weakened 5%	231 (231)	78 (78)
THB/SGD	Strengthened 5%Weakened 5%	5 (5)	(37) 37

(iv) Interest rate risk

Interest rate risk is the risk that the value/future cash flows of a financial instrument will fluctuate because of the changes in interest rate.

The Company's exposure to market risk for changes in interest rates arises from surplus funds that are placed with reputable banks and/or invested in bonds and government securities. The exposure to interest rate risk is closely monitored to maximise the returns on these surplus funds.

Sensitivity analysis for interest rate risk

The following table sets out the impact on profit before tax and equity at the reporting date if market interest rates had been 50 (2017: 50) basis points higher/lower with all other variables held constant. The Company believes that the exposure to interest rate changes on its investments in debt securities is limited since the instruments are short to medium term fixed-income debt securities and the intent is to hold to maturity. As such, only the impact of the changes in the interest rates on the Company's fixed deposits are included in the sensitivity analysis table below.

Changes in variables	Impact on profit before tax \$'000	Impact on equity* \$'000
2018		
+ 50 basis points - 50 basis points	388 (388)	340 (340)

(b) Financial risk (cont'd)

(iv) Interest rate risk (cont'd)

Sensitivity analysis for interest rate risk (cont'd)

Changes in variables	Impact on profit before tax \$'000	Impact on equity* \$'000
2017		
+ 50 basis points - 50 basis points	448 (448)	385 (385)

^{*} Impact on equity is after tax.

(v) Market price risk

Market price risk is the risk that the fair value or future cash flows of the Company's financial instruments will fluctuate because of changes in market prices (other than interest or foreign currency exchange rates). The Company is exposed to equity price risk arising from its investment in quoted equity instruments. These instruments are quoted on the Singapore Exchange Securities Trading Limited (SGX-ST) in Singapore and are classified as available-for-sale financial assets. The Company does not have exposure to commodity price risk.

The Company's objective is to manage investment returns and equity price risk using investment grade shares with steady dividend yields. The Company's policy is to limit its interest in the available-for-sale equity shares to 5% (2017: 5%) of its entire investment portfolio.

Sensitivity analysis for equity price risk

At the balance sheet date, if the market prices of the equity investments had been 5% (2017: 5%) higher/lower with all other variables held constant, the Company's fair value adjustment reserve would increase/decrease by \$\$121,827 (2017: \$\$282,639) arising mainly as a result of a increase/decrease in the fair value of equity securities classified as available-for-sale.

The method used for deriving sensitivity analysis and significant variables did not change from the previous year.

(vi) Concentration risk

An important element of managing both market and credit risks is to actively manage concentration to specific issuers, counterparties, industry sectors, countries and currencies. Both internal and regulatory limits are put in place and monitored to manage concentration risk. These limits are reviewed on a regular basis by the respective management committees. The Company's exposures are within the concentration limits set by the local regulators.

(c) Fair value of financial instruments

Fair value of financial instruments by classes that are not carried at fair value and whose carrying amounts are reasonable approximation of fair value

The carrying amounts of these financial assets and liabilities are reasonable approximation of fair values, either due to their short-term nature or that they are floating rate instruments that are re-priced to market interest rates on or near the end of the reporting period.

Unquoted equity shares are valued based on unobservable data (i.e., net tangible assets from financial statements).

(d) Insurance contract liabilities - assumptions and sensitivities

Assumptions

One of the principal assumptions underlying the estimated claim liability is that future claim development can be approximated by historical experience. This includes assumptions in respect of claim development factors and initial expected loss ratios for past accident/underwriting years. Direct claims handling costs and future claims inflation are implicitly assumed in the valuation methods. Indirect claims handling expenses are derived based on the Company's management expenses over the past couple of years. Judgment is used to assess the extent to which large claims, reinsurance recoveries, as well as the Company's internal underwriting and claim handling policies affect the estimates.

Other assumptions include the discount rate and the provision for adverse deviation attached to the estimates.

Ultimate claim cost development

- (i) The tables below show the actuary's best estimate of the gross and net of reinsurance ultimate claims cost for each accident/underwriting year at yearly intervals together with actual cumulative claim payments for each accident/underwriting year as at 31 December 2018.
- (ii) Ultimate claim costs are then compared to actual cumulative claim payments for each accident/underwriting year as at 31 December 2018 to arrive at the best estimate of claim liability as at 31 December 2018.
- (iii) With the addition of a provision for adverse deviation ("PAD"), the outstanding claim liabilities are reconciled to the outstanding claim liabilities as per the actuarial valuation of policy liabilities as at 31 December 2018.

(d) Insurance contract liabilities - assumptions and sensitivities (cont'd)

Sensitivity analysis

- (i) The purpose of the sensitivity analysis is to assess the relative importance of key assumptions used in the net of reinsurance actuarial valuation of outstanding claim and premium liabilities as at 31 December 2018. In this context, the outstanding claim and premium liabilities are defined as the total claim and premium liabilities for the Singapore Insurance Fund business and Offshore Insurance Fund business combined respectively, including provision for adverse deviation (these are referred to as "the base scenario" in the sensitivity analysis summary).
- (ii) The key assumptions considered in the sensitivity analysis of the claim liabilities include a 5 percentage point increase or decrease in:
 - the assumed initial expected loss ratio for each class of business in the 2018 accident/underwriting year;
 - the first year incurred loss development factors (referred to as "first incurred development factor") for each class of business;
 - the assumed level of indirect claim handling expenses; and
 - the assumed PAD factor for each class of business.
- (iii) The key assumptions considered in the sensitivity analysis of the premium liabilities include a 5 percentage point increase or decrease in:
 - the assumed ultimate loss ratio for each class of business in the 2018 accident/underwriting year;
 - the assumed level of management expenses for each class of business; and
 - the assumed PAD factor for each class of business.
- (iv) The sensitivity analysis is based on the assumptions set out in the actuarial report and is subject to the same reliance and limitations contained in the report. One particular reliance is that the net sensitivity results assume that all reinsurance recoveries are receivable in full.
- (v) The sensitivity values shown for each assumption item are independent of changes to other assumption items. In practice a combination of adverse and favourable changes could occur.
- (vi) The sensitivity results are not intended to capture all possible outcomes. Significantly more adverse or favourable results are possible.

- (3) First incurred development factor sensitivity analysis applies to 2017 accident/underwriting year.
- (4) Expense assumption in sensitivity analysis changed by factor of +1.05 / -1.05

Liability adequacy test

The following table compares the actuarial estimate of the gross and net of reinsurance insurance policy liabilities of the Company with the Company's actual held policy liability provisions as at 31 December 2018.

2018	Gross \$'000	Net \$'000
Actuarial estimate of outstanding claim liabilities including provision for adverse deviation	90,173	59,080
Actuarial estimate of premium liabilities including provision for adverse deviation	54,800	47,013
Total actuarial estimate of policy liabilities including provision for adverse deviation	144,973	106,093
Comparing to:		
Company held provision for outstanding claim liabilities	90,437	59,151
Company held provision for premium liabilities	54,800	47,125
Total Company held provision for policy liabilities	145,237	106,276
2017		
Actuarial estimate of outstanding claim liabilities including provision for adverse deviation Actuarial estimate of premium liabilities including	111,947	55,167
provision for adverse deviation	48,393	41,572
Total actuarial estimate of policy liabilities including provision for adverse deviation	160,340	96,739
Comparing to:		
Company held provision for outstanding claim liabilities	116,692	59,223
Company held provision for premium liabilities	48,393	42,033
Total Company held provision for policy liabilities	165,085	101,256

25. Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating in order to:

- safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders,
- maintain the required level of stability of the Company thereby providing a degree of security to policyholders
- retain financial flexibility by maintaining strong liquidity
- maintain financial strength to support new business growth and to satisfy the requirements of the policyholders, regulators and stakeholders

Capital includes equity attributable to the owners of the Company less the fair value adjustment and amalgamation reserves.

The Company has no borrowings, contingent liabilities and loan capital as at 31 December 2018. There was no change in the Company's capital management objectives, policies and processes during the years ended 31 December 2018 and 31 December 2017.

The operations of the Company are subject to regulatory requirements in Singapore. Such regulations impose restrictive provisions (e.g. capital adequacy) to minimise the risk of default and insolvency on the part of the insurance company to meet unforeseen liabilities as these arise.

The Company is required to satisfy the Fund Solvency and Capital Adequacy Requirements prescribed under the Singapore Insurance Act (Chapter 142). The Company monitors its capital level on a regular basis to assess whether such requirements have been met, and reports to MAS its fund solvency and capital adequacy positions at each quarter and as well as annually. The Company complied with the above mentioned solvency and capital adequacy requirements during the year ended 31 December 2018.
